

Clinical Significance Statement - Example: The patient needs the compounded product as the added Glycine helps the patient maintain muscle mass.

Custom Dosing Needs - If applicable: The patient is unable to tolerate the commercial dose, and requires a specific compounded dose tailored to their needs.

Continuity of Care Statement - Example: The patient cannot access the branded product from their traditional pharmacy and this prescription is to ensure continuity of care.

These statements are required to comply with FDA guidance and to ensure seamless processing of compounded tirzepatide & semaglutide prescriptions. While AGErte Pharmacy provides these examples, they are not intended to replace the prescriber's professional judgement for compounding needs.

Please note: *MONETARY REASON FOR COMPOUNDING CANNOT BE ACCEPTED*. These examples include but are not limited to: "not covered by insurance" or "cheaper than the commercially available product".
